# Young Sun

(831) 346-2854 | ysun9596@gmail.com | ysun.me | github.com/ysun62 | linkedin.com/in/yanglsun

## OBJECTIVE

- Front End Engineer experienced in building modern, responsive, and highly scalable web applications. Seeking a full-time position as a Front End/Full Stack Engineer.

## PROGRAMMING SKILLS

- **Languages:** JavaScript (ES6), HTML5, CSS3, Python, MySQL
- **Frameworks:** React (Hooks), Gatsby, GraphQL, Node.js, Express.js, Django, Redux, Material-UI, Bootstrap
- **Tools:** Git, Figma, VSC, Netlify, Heroku, Google Analytics

## WORK EXPERIENCE

**Front End Engineer (Freelance)** - C&I Studios, Remote                                          **July 2020 - Current**
- Qubee **|** *React, Node, Express, MongoDB, SCSS, Reactstrap* **|** Github
  - A C&I Studios cloud storage solution built with MERN stack.
  - Implemented presentational and functional components using React. (No further details available due to a non-disclosure agreement).
  - Worked closely with the lead developer to ensure consistency throughout the whole project.

**Front End Engineer Intern** - Infinite Options, San Jose, CA                                     **Mar 2020 - July 2020**
- Project Caitlin **|** *React, Express, GoogleAPIs, Material-UI, Bootstrap, Firebase, Heroku*
  - A web based calendar application built for those who suffer from memory loss.
  - Implemented recurring events feature to make the application more customizable and user-friendly.
- Prep To Your Door **|** *React, Python, Material-UI, Bootstrap, MySQL, Netlify*
  - A meal delivery service application based in Austin, Texas.
  - Developed data tables using React to help admins better analyze which meals are trending/more profitable.
  - Collaborated in a team of developers to develop new features, integrate, and debug.

**Web Developer (Freelance)** - ThyssenTransp LLC, Remote                                          **Dec 2019 - Mar 2020**
- Cadidar Web **|** *React, CSS3* **|** New Site · Old Site
  - Improved site performance, security, responsiveness, scalability and aesthetics.
  - Redesigned and developed the company website using React based on the old site.

## PERSONAL PROJECTS

**Disable Scrolling |** *React, JavaScript, CSS3* **|** Chrome · Firefox · Demo · Github                     **Jun 2020**
- A browser extension that allows users to disable scrolling on the current web page. The intended use case is to prevent the page from auto-scrolling when using the Find Bar. Available on both Chrome and Firefox.

**Personal Website V2 |** *Gatsby, React, CSS3, Netlify* **|** Demo · Github                                 **Jun 2020**
- The second iteration of my personal portfolio built using Gatsby to showcase other projects.

**NBA Voting |** *React, Django, Redux, CSS3, Heroku* **|** Demo · Github                            **Oct 2019 - Dec 2019**
- A full stack personal project built with React, Django and Redux to interact with NBA fans.
- Constructed a REST API with Django to securely store user information in the back end.
- Utilized Redux and local storage token authentication for user sign in/up functionalities.
- Guaranteed responsiveness, clean layout, and modern design by taking the mobile-first approach.

**Django Blog |** *HTML5, CSS3, Django, Heroku, AWS* **|** Demo · Github                                     **Aug 2019**
- A back end blog platform built using Django which allows the user to post and view blogs.
- Utilized Django built-in authentication for user sign in/up and reset password functionalities.

**Shopping Website |** *HTML5, JavaScript, Vue, Web2py, Python* **|** Demo · Github                          **May 2019**
- A full stack online shopping website built using Vue.js, Python and Web2py.
- Implemented a review & rating system which allows the user to leave feedback on the products.

## EDUCATION

**Bachelor of Science, Technology & Information Management**                                      **Sep 2015 - Aug 2019**
**University of California, Santa Cruz**
